**ANDROID INSTRUCTIONS**

**CONNECTING TO “EDUROAM” WIRELESS NETWORK**

**STEP 1:** Navigate to your Wi-Fi connection icon. If you are connected to any wireless connection, disconnect that first. Select “eduroam” wireless as shown in the image on the left hand side.

**STEP 2:** Selecting “eduroam” wireless should bring up a window similar to the one shown on the left. In the Identity row type your NetId@mesa.gmu.edu and put in your Patriot Pass strong password in the Password row. Click on “Connect”.

**STEP 3:** You have now completed the one-time set up of the “eduroam” network connection on your phone. In the future, when you are at a non-GMU location which has “eduroam” wireless, you can then access it with your Mason credentials from step 2 above. See [https://www.eduroam.org/](https://www.eduroam.org/) for locations where eduroam is available.
